## Learning Resources

On Ashnet, following links to Chemistry - <https://intranet.ashlawn.org.uk/chemistry-1>

In addition, many more resources will be added to the Chemistry Google classroom page in September.

## Learning Strategies

Our most successful students are those who learn the definitions of key concepts, use keywords, make revision quizzes and use past papers to apply their knowledge.

## Writing Long Answer Questions

Read the question carefully.

Write your information in a logical order

State the obvious – the examiner is checking that you know the content.

## Independent study

Read around the topic areas using the websites suggested by the department; there are also many books available in classrooms and the library. Start planning your revision in September; this will make it easier. Use past papers to help you to apply your knowledge to unfamiliar questions. Ensure you know the definitions of keywords as this helps to gain easy marks in the exams.
