

Dear Visitor

5th March 2020

We are writing to give you details of our position regarding the Coronavirus outbreak.

As of this morning all the members of our community that informed us that they were awaiting test results have been shown to be negative and given the all clear.

It is anticipated that the number of individuals being tested in the UK will rise in the next few weeks and we will not publish an update each time a pupil or staff member is tested. However, in association with Public Health England, we will inform 'close contacts' of any individual within our community who tests positive for COVID-19 of the situation and the actions they should take.

This position is in line with Public Health England and NHS advice and guidelines.

We should be very grateful if all visitors to Dulwich Prep London would ensure that they are aware of our position and that they too are in line with [current advice](#). We will understand should you wish to rearrange your visit and, if that is the case, please email your contact within our organisation.

We request that any school group intending to visit Dulwich Prep London makes the parents of the children involved aware of our position in advance of the visit. Accompanying staff should also be informed.

Many thanks for your cooperation and understanding.

Yours sincerely

Miss Louise Davidson
Head Master
