

# Computer Games: Remember!!

- Pan European Game Information (**PEGI**) Ratings show **MINIMUM** appropriate age!!
- Some games allow multiplayer. You join forces with other players and battle against other groups. Because your team mates are worldwide, it can result in playing 24-7
- Violent, adult (18) games are worse than watching 18 rated films because your son / daughter is the **perpetrator** of extreme violence, choosing victim, weapon & method.

Each game case shows the PEGI age rating & also shows WHAT the game involves:

	This rating is applied once the depiction of violence and / or sexual activity reaches a stage that looks the same as would be expected in real life. More extreme bad language, the concept of the use of tobacco and drugs and the depiction of criminal activities can be content of games that are rated 16.
	The adult classification is applied when the level of violence reaches a stage where it becomes a depiction of gross violence and/or includes elements of specific types of violence. Gross violence is the most difficult to define since it can be very subjective in many cases, but in general terms it can be classed as the depictions of violence that would make the viewer feel a sense of revulsion.
