2nd October 2018

Dear Year 3 Parents/ Carers,

RE: YEAR 3 PROJECT WORKING WITH DULWICH COLLEGE

We are delighted to inform you about our exciting new science project working with teachers and students from Dulwich College.

Over the next three Thursday afternoons (leading up to half term) the students from Dulwich College will present the Year 3 classes with a number of different animals such as chameleons, tarantulas, a boa constrictor and a corn snake!

The children will be able to become wildlife experts through learning about the animals and looking at them closely. The children will be trained on how to handle the animals carefully in order to minimise any distress to the animals. All children who choose to handle the animals will of course wash their hands afterwards.

In addition to the animal presentations our visitors will also be demonstrating a number of exciting experiments e.g. elephants' toothpaste, blue bottle and turning wine into water (using Ribena instead of wine)!

The workshops will be a fantastic learning opportunity for the children and we expect they will have plenty to tell you about after school!

Best wishes

The Year 3 Team

Headteacher: Ian Hyde
Deputy Headteachers: Louise Bryan, Tara Magee and Kris Clark
