Lessons per fortnight	6
Homework per fortnight	90 mins

Year 8 Science

1. Course & Subject Information

Year 7 and 8 students receive three 1 hour lessons each week. The students follow a bespoke scheme of work devised by the academy but based on the National Curriculum for England and Wales.

2. Course/Subject Structure

3. Recommended texts or websites to support home learning

CGP provide excellent revision guides and workbooks that cover the whole of the KS3 specification. The BBC Bitesize website is also an excellent resource

4. Specialist Equipment/Materials Required if applicable

Students should come to every lesson with the basic equipment of a pen, pencil and ruler. Lab coats are not essential and will be provided if required during the lesson. It is fully expected that students adhere to safety procedures in the laboratories and wear safety goggles when instructed.
