Biology																														
1. Cell biology	JM																		JM											
2. Organisation		GA																							JM					
3. Infection and response							JM																			GA				
4. Bioenergetics								GA																						
5. Homeostasis and response													JM																	
6. Inheritance, variation and evolution														GA																
7. Ecology																			GA											
Chemistry																														
1. Atom structure and the P. table			CO																											
2. Bonding, struct, properties of matter				KCA																										
3. Quantitative chemistry									CO																					
4. Chemical changes										KCA																				
5. Energy changes															CO															
6. Rate and extent of chemical change																KCA														
7. Organic chemistry																					CO									
8. Chemical analysis																						KCA								
9. Chemistry of the atmosphere																											CO			
10. Using resources																												KCA		
Physics																														
1. Energy					KBA																			LM						
2. Electricity						LM																							KBA	
3. Particle model of matter											KBA																			LM
4. Atomic structure												LM																		
5. Forces																	KBA													
6. Waves																		LM												
7. Magnetism and electromagnetism																							KBA
