

18 September 2018

Dear Parents/Carers,

As you may have noticed, Usborne Cluster have changed their ACE target process to allow for a more rigorous system which allows pupils to make progress towards their EHCP targets. These targets have been broken into small steps which we hope students will be able to achieve over two terms, however, if targets are achieved before this time, new targets will be set as and when needed, meaning you may receive updated ACE plans throughout a term.

We hope that this will allow ACE targets to be more student-centred. If you see your child making progress in any of these areas at home, please note them in their diaries and feel free to send in photos.

We now use SCRUFFY targets in Usborne. SCRUFFY as opposed to SMART means that targets are:

- Student-led
- Creative
- Relevant
- Unspecified
- Fun
- For
- Youngsters

We hope that these will best reflect our sensory students and aid them in their progress and achievement.

Kind Regards

Ginny Finch
Usborne Cluster Leader
