

## Moorside High School Remote Access Agreement for Students

It is now possible for students to gain remote access to the school's computer system from home to access their own personal files and school resources. Access to the computer system is subject to the same rules that apply in school and is closely monitored.

Any violations of the Students Acceptable use Policy will result in the permanent removal of Remote Access Rights. Any violations of a serious nature may result in the involvement of outside agencies as directed by the Head Teacher, School Governors or the LEA.

The computer used for remote access must have anti-virus software installed that it is fully up-to-date and a valid licence for Microsoft Office.

To enable remote access, please return the form below to the ICT Office.

.....

### Request for Remote Student Access

I request permission to access the schools computer system remotely and agree to abide by the terms of the schools acceptable use policy.

**Student Name:**..... **Signature:**.....

**Date:**.....
