

Careers – Year 10

The focus is on self-development, self-awareness and skills development along with how to research opportunities and options post 16

In Year 10 as part of the PSHE programme students will:

- Identify the skills employers value and take control by planning how they can develop and demonstrate them.
- Discuss the qualities and actions that help people to succeed
- Learn to identify key skills that they should develop for life and work
- Select areas for self-improvement and plan steps they will take
- Learn about Labour Market information and the impact it can have on career choices
- Learn how globalisation affects employment and career planning
- Explore employment trends and changes to occupational sectors
- Be aware of the impact that technology has on employment sectors

As part of the programme local training providers, colleges, apprentices and employers will come into school to talk to the students about their options post 16.

All students in Year 10 will have a 1:1 meeting with a careers advisor, form tutor, head of year or member of the senior leadership team about their option choices, career routes and post 16 options. This will set out an individual career learning plan which will help students set career targets for the future and will form part of their target setting review.
