Activities anyone can have a go at:

- Keep a digital journal over the next few weeks. This could be typed letters, photographs, little films or more. Record your events, day-to-day activities, fears and feelings. Interview each other during this time and let the entire family be a part of it. When this is all over, save and store your digital diary in a safe place for years to come. Your children can then share this diary with their children and grandchildren. Help your child create a tangible, primary source for their own history.
- Useful websites/apps for this:
  - 1 Second a Day (make sure to back up work)
  - iMovie
  - Audacity
