

# Reception Home Learning

## EVERY DAY I MUST...

## EVERY DAY I SHOULD TRY ONE OR TWO...

Cook something at home. Can you write a shopping list or the ingredients you used, what about a recipe?	Try making some puppets, will they be real or shadow puppets? Can you act out a favourite story with them? Why not write your own story for them.	Let's play a game, find someone to play snakes and ladders or snap with you. Do you have different games at home? What are they? Perhaps you could make some games like hopscotch or a ladder game, roll a dice to see who gets to the top the quickest, you could even try it counting backwards.	Let's go shopping. Why don't you make a shop? Perhaps it is a fruit shop or a book shop, write price labels to let people know how much the things cost, count the money to make sure they have given you the right amount.
Do something to make your hands strong. Make a pasta necklace, help peg washing on the line, see if you can pinch beads out of some playdough. Use scissors!	Can you make an obstacle course? Jump over, crawl under, can you do it quicker? Who is the fastest at completing your course in your family? What are the rules?	Make a den. Where will your den be? Will it keep out bears? Can you test it? Or is your den just for stories?	Make a magic potion, what will you put in? What will it do? Can you freeze it or boil it? Does it change? Can you write your magic spell?
Can you count items? Count twenty steps, ten jumps, touch your toes five times. How many objects can you count? Can you pick out 3 (etc.) objects from a collection?	Can you retell a story you have read with a grown up? Take a turn reading the book to somebody at home. Maybe you could change the ending! What other adventures might those characters go on? Try writing and illustrating your own story for them.	What can you make out of newspaper? How tall can you make your sculpture? Can you make somebody some new clothes? How small can you fold it? Are there other materials you can model with? What would you like to make? What will you need? How will you make it?	Make a treasure map, what treasure is at the end? Who will follow the map? Can you cut out using straight and wiggly lines?
Practise sounds and tricky words from your sounds book. Play hangman or bingo with your family, who can hear the most sounds? Make up silly words with the letters, try making lists of rhyming words, can you put the tricky words in a sentence?	Sing your own version of 'Old Macdonald had a Farm' with your own animals? What noises will these new animals make? Make a noise; can you guess which animal I am doing? What other songs do you know? Can you add your own verses to these?	We will miss you at School. Write a letter or postcard to Miss Lee. Address and post it. Tell me all about what you have been up to at home.	Can you use things like pasta or dried beans to make a pattern? What shape is each of your pieces? What colours are there? Is it a shape or colour pattern?

### TO CHALLENGE MYSELF, I COULD...

Can you use your letters: try keeping a diary while you are at home, each day take a photo or draw one thing you have done and write a sentence about it.

OR

Can you use your letters: look at [www.pobble365.com](http://www.pobble365.com) and write a sentence about each day's picture.

OR

Can you use your letters: watch <https://www.youtube.com/watch?v=6FfW3X1V4J0> and then make comic books using your own toys. You can draw pictures of what they are doing and write the sentence.

Can you use your numbers: choose a number each day and use it in different ways. Collect that many toys in a basket, jump, pat your head, hop, bang that many times, make the number using two dice, make the number using three dice, write a number sentence for the number i.e.  $2+3=5$ , what would that look like if you were representing it with dots?

OR

Can you use your numbers: estimate how many...  
Ask a grown up to fill a jar with some pasta/pens/counters (no more than 10) and then estimate how many are in there, count them, were you right?

OR

Can you use your shapes: create a structure using building blocks or a pattern using shapes. What shapes have you used, how many sides do they have, do they fit together, do they roll or do they slide?

Drawing lines. Can you follow lines that your grown up draws for you with some scissors? Which are easier, straight lines, wiggly or zig zags? Can you cut pictures out of old magazines to collage?

Exploring words. Can you find and learn a poem?  
Can you make up actions and perform it?

Finding facts. Can you think of something you would like to learn about, just like we decided to learn about space? Can you find out some facts about it, try looking it up on the internet or in a book. Are there any experiments you could try or facts you need to write down?

## WEBSITES I WILL NEED...

cosmickids.com for  
yoga and  
mindfulness

<https://www.readingrockets.org/article/talking-and-listening-practical-ideas-parents>

<https://www.twinkl.co.uk/resources/parents>

Watch Number Blocks  
and Number Songs on  
BBC IPlayer.

<https://www.foundationyears.org.uk/files/2012/03/Development-Matters-FINAL-PRINT-AMENDED.pdf>

Look at the 'What adults  
can do' column
