Animal Management (Level 3) 2020

About the Course

This course gives you the opportunity to learn about and build on the essentials of working with animals. It combines both theoretical and practical aspects of animal care.

Areas of Study

You will learn how to work safely around animals, be responsible for the planning and carrying out animal husbandry health and handling, and feeding and nutrition. You will also learn about animal behaviour, animal breeds and welfare and business skills. Plus opportunities for either animal management specialism or applied science.

Work Placements

This course includes a module of work experience. A portfolio of evidence of the placement must be completed and will count towards the final grade.

Method of Assessment

Externally set and externally moderated assignments.
Externally-set, externally-marked exams, which are sat under examination conditions.
Portfolio of evidence.

After Completion

Upon successful completion of this course you could progress to:
Advanced Apprenticeship within the Animal Management sector
Further learning within a Higher Education Institution.

Entry Requirements

5 GCSEs at Grade 9-4 plus Grade 4 in English.
Satisfactory references from your most recent School or College.
