

Fuelling the Future

Earth, Air, Fire & Water
Erasmus+ KA2 Project

2014 - 2017

Newsletter 4 December 2015

Here is Our Fourth Erasmus+ Project Newsletter!

The seven partner schools of Erasmus+ Project were in Sweden from 19th_23rd October 2015 for the third visit. There were teachers from each school and pupils.

Teachers and students investigated what renewable energies are most common in Sweden. They tried to discover the technologies affected by Biogas. They also investigated the geography, food, culture and language of Sweden.

THE THIRD VISIT AT EDVARDSLUNDSSKOLAN IN SWEDEN

The coordinator Pernilla and Marcus planned a week of exciting activities for us and we experienced what life is like at their school in Sweden. We could also develop our experience about renewable energy.

DAY 1 Edvardslundsskolan welcomed all the visitors and each school presented their school and country. While coordinators were having a meeting, teachers had a tour at school and pupils had class.

DAY 2 In the morning, the teachers had lessons in different renewable energies. In the afternoon coordinators and Czech teachers went on visit for renewable energy.

DAY 3 We had a very exciting visit to Stockholm by bus and had a city tour. We enjoyed the sites of this beautiful city. It was a very interesting and informative visit to the Technical University of Stockholm.

DAY 4 We had more lessons and shared our teaching and learning skills. Throughout the week the students were able to learn from all different teachers about a number of topics concerning renewable energy. It was a great experience for us.

DAY 5 After the visits in classrooms there was a skype time.
