NAME.....

Psychology: Session Notes

Drawing space

A-level Psychology

You will be taught the AQA specification for A-level psychology. The specification has been designed to provide a thorough introduction to the scope and nature of psychology as a science, through the delivery of a broad range of topics. The emphasis is on applying knowledge and understanding rather than just acquiring knowledge, thereby developing your transferable skills of analysis, evaluation and critical thinking.

Course Overview

Paper 1: introductory topics in psychology

- social psychology
- attachment
- memory
- psychopathology

Paper 2: psychology in context

- approaches
- biopsychology
- research methods

Paper 3: Issues and options in psychology

- issues and debates in psychology
- relationships or gender or cognition and development
- schizophrenia or eating disorders or stress
- aggression or forensic psychology or addiction

Each paper is a written exam lasting 2 hours, 96 marks and 33.3% of the overall A-level.

Each paper is a combination of multiple choice, short answer and extended writing style questions.

Assessment Objectives

Assessment objectives (AOs) are set by Ofqual and are the same across all A-level psychology specifications and all exam boards. The exams will measure how students have achieved the following assessment objectives.

- **AO1:** demonstrate knowledge and understanding of scientific ideas, processes, techniques and procedures
- **AO2:** apply knowledge and understanding of scientific ideas, processes, techniques and procedures:
 - in a theoretical context
 - in a practical context
 - when handling qualitative data
 - when handling quantitative data
- **AO3:** analyse, interpret and evaluate scientific information, ideas and evidence, including in relation to issues, to:
 - make judgments and reach conclusions
 - develop and refine practical design and procedures

With help and support from your teacher you will be actively involved in monitoring your own targets and achievements in psychology. It will be expected that all your work will be completed on time and will then be marked and returned to you promptly. You will be expected to make any changes/additions suggested on all marked work. Failure to complete work will be dealt with by Miss Reding and the Sixth Form team.

Psychology is a fascinating subject that seems to interest all. The knowledge and skills you can develop are relevant in many walks of life and will stay with you, long after you leave school, regardless of your chosen career path. Lessons will be planned to stimulate and challenge your understanding but the more you put into psychology, the more you will enjoy it.

Psychology Summer Work

For the task below, use the following website <https://digest.bps.org.uk/>

Task One

Research, selection and evaluation of material

Find an article on the website relating to any topic that interests you. Read the article and summarise the main points that you have learnt. How does this article fit in with current psychological schools of thought? Does it challenge current ideas or reinforce them? In what way does it do this? How reliable is the evidence in the article? Also, explain why you picked this article in the first place. Why did this topic particularly interest you? To ensure you write concisely, complete this task using no more than one side of A4.

Task Two

Case Study profile

Find and read the article 'Psychology's 10 Greatest Case Studies'. Pick any case study from this article and find as much information as possible about it using a variety of legitimate, reliable sources. Make it clear where this case study could fit within the psychology specification we will be studying. You can present your work in any format you like (poster, mind map, essay, social media profile etc) although it must not exceed a single side of A4.

Please bring the work to our first lesson in September and be prepared to discuss what you have found. Please take your time completing these tasks, and ensure all work is in your own words, as this will be my first impression of you in psychology. What kind of student do you want to be in the sixth form?

I look forward to meeting you in September.
