2 February 2018

Dear Families

### **Mathematics Test Foundation**

All Year 10 students will sit a 45 minute mathematics test on Friday 23 February 2018 in their normal maths lessons.

Modules covered in the test are

- angles and properties of triangles
- quadrilaterals and polygons
- solving linear and simultaneous equations
- solving inequalities
- substituting and rearranging formulae
- expanding double brackets.

Your child is being issued with a printed copy of a revision list, which includes further details on the key topics and information about other resources. I have also attached a PDF copy in case they misplace it.

I would appreciate your support in ensuring that your child spends about three hours working through topics in the revision list before the test. They may wish to look back through their exercise book to help decide where to focus.

As part of our continual assessment in the maths department, groupings are regularly reviewed and any changes to groups may be made in consideration of assessment results, class work and effort over the last term.

Yours faithfully

*MI Kosch*
