18 December 2018

Dear Families

The mathematics department will be returning the mock examination papers to students during the remaining lessons of term. Students have been given the opportunity to write corrections on their papers. These papers, with their corrections, form an important revision tool as the papers are from past exams and represent fairly what your child's mathematics exams will be like in the summer. Grades for the mock will not be given until the results day in January, when all grades from the mock examinations will be issued.

Following the review of the exam papers, your child has been issued with personalised learning checklists which help identify the topics in which they scored highly, and those where clear improvements could be made. These should have been fixed into their maths books and students should have completed some work on their identified areas for improvement.

Your child should use the corrected papers and checklists to target further revision.

Additionally, your child will bring home a small A5 booklet from a company called Birmingham Maths. This will focus on repetitive skills practice at specific grades and has been selected appropriately for each set. Please ensure that your child completes the booklet, marking their answers from the middle section as they work through it. This should be returned to their maths teacher no later than Monday 14 January. The aim of this work is to keep current and strengthen basic skills so that students are ready to move on when we return in the Spring term. Your support is much appreciated.

Yours faithfully

Ms I Kosch
CL Mathematics
