Year 7 Maths Exam

Dear Families

In mathematics all students were initially placed in a mathematics set based on their Key Stage 2 score, where available. Where data was not available, students were placed where there was available space in set 2, 3 or 4.

Two tests will be conducted this half-term to ensure that students are in the correct sets. The first test will take place Friday 29 September in normal maths lessons and the second will take place in the week beginning 16 October.

There are two levels of test with a high degree of overlap so that students will be set as accurately as possible. There will be another test early in the spring term when there will be another opportunity for adjustment. Going forward, the mathematics department carries out tests once every term in order to monitor progress and to ensure that students are in the correct set.

Your child's class teacher will also give some time for revision in class and support them in their preparation

Yours faithfully

Miss C Scott
