Dear Families

Year 8 Summer Term Science Assessment

This is to inform you that all Year 8 students will be taking their summer term science assessment in their science lessons between Monday 17 June and Friday 28 June. There will be three assessments, one for each discipline, and questions will be drawn from the topics they have studied throughout Year 8, as below:

- Biology: Inheritance, Photosynthesis, Respiration, the Body;
- Chemistry: Elements, Reactions, Reactivity Series, Magnetism;
- Physics: Electric Circuits, Forces, Light, Space.

Learning journeys for each topic have been distributed throughout the year and should be in your child's book. We will also put these onto Show My Homework. There will be some structured revision time in their lessons prior to the assessment.

There are a number of free revision resources that students can use to aid their independent revision, as follows:

- Doodle: <https://www.doddlelearn.co.uk/app/login>
- BBC Bite-size:
https://www.google.com/search?q=bbc+bitesize+ks3+science&rlz=1C1GCEV_en&og=bbc+bite&aqs=chrome.1.69i59l2j0j69i60j69i57j0.2059j0j4&sourceid=chrome&ie=UTF-8&safe=active&ssui=on
- Education Quizzes: <https://www.educationquizzes.com/ks3/science/>

Following these assessments, all Year 8 students will be completing two weeks of practical work, applying many different areas of their knowledge to some exciting STEM projects. These will involve planning, conducting and analysing practical investigations that will test their problem-solving, investigative and analytical skills, as well as working as part of a team.

Yours faithfully

Ms Athwal
Key Stage 3 Lead, Science
