Year 9 Mathematics Homework Schedule

Dear Families

In Year 9, students will be set two 40 minute homework tasks each week. These may be set together as a single 80 minute homework or separately. The homework schedule for the first half term is below. These resources can be found on Firefly in the Resources/Maths/ Year 9 section. The class teacher will give students due dates when the homework is set. On occasion teachers will set either MyMaths tasks or Directed Improvement Tasks (DIT) based on tests. If your child is absent they are expected to complete the homework.
