

Tolworth Girls' School - A level Press Release August 2018

We are delighted to announce that our sixth form students achieved a record breaking set of results this summer, with 25% achieving A*/A, 50% achieving A*-B and 75% achieving A*- C. 25% of our students achieved at least two grade As at A level. We are particularly pleased as for many subjects this is the first time students have sat the reformed A level examinations, recognised as being more challenging. We would like to congratulate all our students and staff who worked so hard to achieve these grades.

As an inclusive sixth form, we are proud that we have been able to support so many students throughout their sixth form studies and enabled them to progress onto higher education courses and into careers that match their aspirations.

Once again we are sending our students on to study an exciting range of subjects at university, ranging from Criminology, Zoology, Mechanical Engineering, Radiography, to Journalism, Drama, Philosophy and Media Studies. We have had so many individual success stories with students securing places at top universities to study Medicine, Law and Dentistry. We are also delighted that students have secured places on some of the most competitive higher level apprenticeships including International Law and Media & Communications.

We know that a lot of our students have overcome real adversity to achieve these phenomenal grades, not only students who joined our sixth form new to the UK but also those who have had to deal with serious health problems and family responsibilities; their determination, combined with the care and support of our staff, has resulted in success worthy of celebration.

Congratulations to all our Year 13 Students

We would particularly like to congratulate to the following students for their outstanding achievements:

Charlotte Cropley who has secured a place at Bath to study Chemistry having achieved three As and an A*.

Angela Dolamulla Hewa Kankanange who has secured a place at Imperial College London to study Medicine having achieved four As.
