Doctor in the house (series 1 episode 1)

- What life stages are the two clients in?
- What are the lifestyle factors that are influencing the symptoms of poor health?
- What observations/measurements are taken to examine the health of each patient?
- What techniques are given to improve health?
- What characteristics does the Doctor show?
- How does he show these characteristics? (ie body language/verbal communication)

Diploma students

Ella is a 13 year old girl who is dyslexic and has a sight impairment. She lives with her grandmother as her parents have recently separated. She has started truanting from school and is demonstrating challenging behaviour whilst at home and at school.

Investigate the local health and social care provision available to support Ella and her Grandmother now and in the future.

Research!

A large empty rectangular box with a thin blue border, intended for students to write their research findings.
