

At our school, we use a phonics programme called 'Phonics Bug' to teach synthetic phonics across the Early Years and Key Stage 1. This programme excites and inspires children to become readers and writers.

The synthetic phonics programme combines a rigorous structure with the best of today's technology. The well-written books and eBooks fully engage the children, with the appealing artwork and photographs.

Phonics Bug gives the children daily whole-class teaching sessions featuring CBeebies video clips and games linked to reading, spelling and writing as well as a wide array of pupil games and activities for consolidation.
